

solutions

restaurant digital signage

Think that restaurants might not have a use for this?
Think again!

Here we offer you the possibility of enhancing customer experience. Whether your restaurant is with high end business or just a place with an assortment of customers, we have the perfect product for you!

What you can do is

- Outside the restaurant:
 - Put up interactive menu so that passers-by can have a look at what you are offering
 - Put up attractive offers eg, promotions, set meals, soup/dessert of the day
- Inside the restaurant:
 - Interesting facts
 - Messaging service
 - Advertisements
 - Game matches

In essence, you can optimize whatever you are broadcasting according to your target group at any-time of day. For example, if your restaurant has majority of students in the afternoon, you can put up educational features and in the night is where working adults chill, you can put news feeds or documentaries (according to target group).

Connect and Bring Value to People
