

solutions overview

casinos

Raise visibility and enhance your casino's environment with a digital signage solution by Four Winds Interactive. Give your guests fresh content using digital signs and easy to read wayfinding instruction. Promoting casino amenities, jackpot winners, entertainment venues, dining, or even outside advertising can make a serious impact on your bottom-line.

Four Winds Interactive can help you manage a network of digital signs; everything from slot ends, restaurant menu boards, property maps, meeting rooms, elevators, back of house, and in-guest room television solutions to assist casinos in enhancing their guest experience. Four Winds Interactive digital signage solution can be interfaced with your existing event management system to automatically display real time information. Our software and services offer an enterprise-wide solution enabling casinos to rapidly build and easily manage display networks, with shared control between the property and corporate levels.
